

DALTON

Smart Online Single Phase UPS
Double Conversion Technology
Pure Sine Wave

U10 Series (1,2,3,6,10KVA)

Dalton U10 is aspire to introduce the latest DSP true on-line double conversion UPS for protecting small and medium sized mission medical, critical & IT loads so as, The robust design is also suitable for more traditional, industrial applications. Both to safeguard your valuable equipment and critical data from any interrupted power, such as surges, blackouts and lightning strikes.

- True double conversion
- Advanced DSP and 3-level technology
- High efficiency 95% (up to 98% in ECO mode)
- Full digital control system
- Maintenance Bypass Switch
- Dual-input design, supporting independent bypass
- Optional SNMP Communication Port
- Transformer less UPS Technology
- Generator compatible
- USB standard Communication port
- Transformer less UPS Technology
- Unity output power factor 1
- Low input current value (THD<3%)
- Cold Start Function
- Automatic Battery Test
- Wide input range
- 15 Years Spare parts Support
- Voltage Regulation within 1%
- Flexible battery configuration (settable 16 - 20 pcs batteries)

LCD Smart Display

Dalton U10 Series The front display panel LCD+LED display, multifunctional keys operation, friendly human-machine interface.

Provides all major systems parameters and operational status of the UPS that include full diagnostics for simple, easy servicing.

The U10 series UPS with DSP control, systematically checks each component and displays the result using on LCD display.

This feature allows service technicians the ability to pinpoint and repair the UPS very quickly.

Simple Network Management Protocol (SNMP)

U10 provide SNMP card, it has the function to remote monitor and control UPS, warning notifications through broadcast and mobile phone, multi-shutdown PCs, and schedule UPS self-test.

This unique software provides complete power protection for computer system during power failure.

The software supports lots of O/S including Windows family, Linux, FreeBSD.

More than that, to offer increased benefits for our customers, we have also released USB version MAC version on the internet.

- Power flow display for monitoring UPS status.
- Scheduled system shutdown/restart.
- Scheduled UPS test.
- Warning notification via E-mail / SMS.
- Warning notification via Broadcast.
- Password security protection.
- Remote Monitor / Control via LAN.
- multi-shutdown PCs, and schedule UPS self-test.
- Secure communication over VPN.
- The alphanumeric display provides very detailed information about measures, state and alarms, available with 8 different languages.
- SNMP gateway server will be installed locally to communicate with SNMP cards
- Windows family; Linux; Sun Solaris 7/8/9; IBM AIX 4.3x, 5.1x; Compaq True64; HP Unix; FreeBSD; HP -UX 11.x and MAC

This user-friendly monitoring tool enables you to monitor and manage your UPS system as an integral part of your power infrastructure.

It collects data through the network, then stores it in a database for viewing and analysis.

Advanced Communication

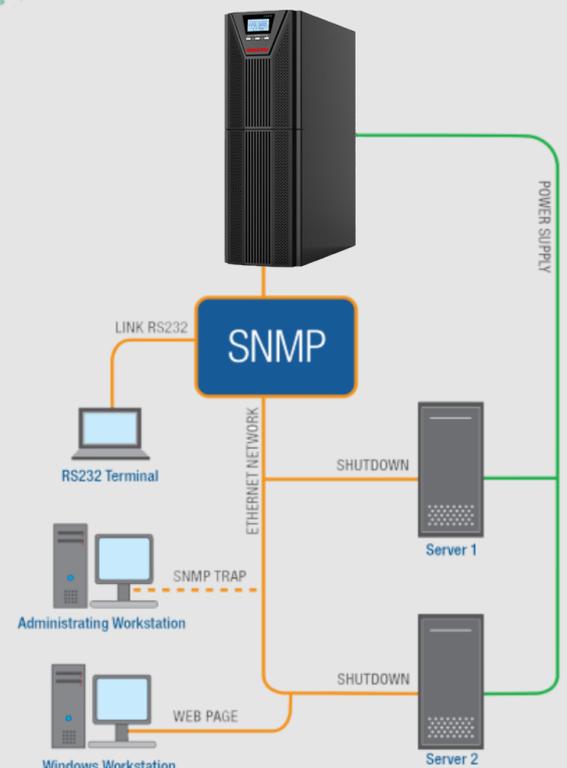

Communication is cross-platform and supports all operating systems and network including monitoring software, UPSMON shut down with SNMP agent too.

There are 3 slots available for installation of optional communication accessories such as network adapters, free contacts, etc.

There are hardware devices available optional like:

REPO (Remote Emergency Power Off) for emergency switch off the UPS through emergency button; connection of the auxiliary contact of an external manual bypass; input for synchronization from an external power source.

Direct Connection with Ethernet Network

Double Conversion Online Topology with Unity Power Factor

Dalton is proud to present the true online topology uninterruptable power supply, the U10 series, designed in tower form provides continuous pure sinewave power with its peak unity power factor 1 double conversion technology and high frequency design,

With its market leading performance, the U10 series is the ideal power solution for net-work server rooms, cloud execution and storage systems, telecommunication centers, sensitive and critical electronic systems, or any system requiring high capacity and stable power supply.

The Most Compact Design and Minimizing TCO

The smallest dimensions in its class saves significant space for more critical equipment.

A pioneer in unity power factor (kVA=kW) to maximize power availability.

The highest AC-AC efficiency up to 95% and efficiency of 98% in ECO mode for exceptional energy cost savings.

Automatic speed regulation function with multi-stage fan speed control maximizes system efficiency, significantly reduces audible noise, and prolongs the service life of the fans.

Maintenance Bypass Switch

The maintenance bypass switch located on the rear of the unit is internally interlocked with the static transfer switch. Removal of the secure panel will safely activate the internal bypass and protect the UPS from misuse.

Intelligent Battery Management & Protection

Proper battery care is critical to ensuring correct UPS operation in emergency conditions.

Deep discharge protection.

Low AC ripple with automatic and manual battery test.

Interactive external battery circuit breaker position sensing interactive battery circuit breaker control.

Two stage battery self test, a short test and an intensive test with adjustable test intervals.

Adjustable battery charger system for short and long runtimes.

Battery temperature compensation option.

Unlimited extendible runtime using matching battery packs.

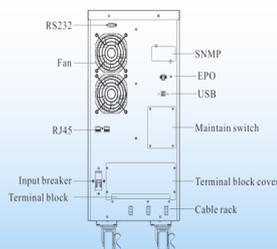

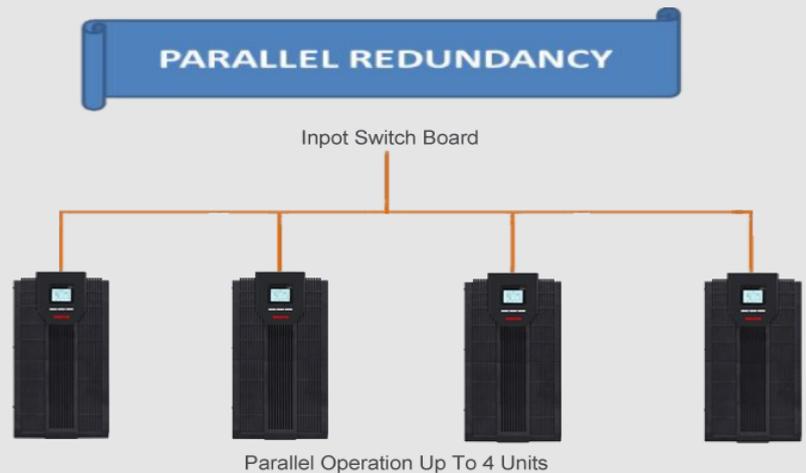

Redundant Parallel Architecture

Up to 4 units Dalton U10 can be connected in parallel 6kVA to 10kVA, UPS in parallel configuration to meet most demanding power requirement.

Increase power availability and flexibility.

Parallel Redundancy features provides economic power solution for system integration.

Furthermore, parallel redundancy feature equally share the load to maximize UPS performance and more secure UPS continuous operation.

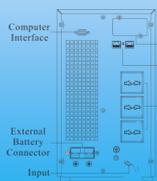

Front & Rear Panel Explanation

Dalton U10 Front of the contain only the LCD display.

The back of the UPS consists of the following parts, user interface:

USB for smart connection interface terminal resistor for parallel function CAN Bus connection port for parallel system customer options slot 1 customer options slot 2 cooling fan external battery connector external charger Connector utility input breaker CB1 bypass input breaker CB2 (for dual input model only) CAM Switch (maintenance bypass switch) Input / output terminal block EPO (Emergency power off) Air ventilation .

Technical Specifications

Model		U10 1K	U10 1KS	U10 2K	U10 2KS	U10 3K	U10 3KS	U10 6K	U10 6KS	U10 10K	U10 10KS	
Power Rating		1KVA / 1000W		2KVA / 2000W		3KVA / 3000W		6KVA / 6000W		10KVA / 10000W		
Input	Input system	Single phase with ground Single (1Φ + N + PE)										
	Rated voltage	208V/220V/230V/240V										
	Voltage range	(110±5)VAC~ (228±5)VAC										
	Power factor	≥0.99										
	Frequency range	40 ~ 70 Hz										
	Rated frequency	50 / 60 Hz (auto-sensing)										
	Voltage range of bypass	(- 25% ~ +15% (settable) Easy software adjusted					(- 40% ~ +15% (settable) Easy software adjusted					
	Total harmonic distortion (THDi)	≤ 6%					≤ 5%					
Output	Output system	Single phase with ground Single (1Φ + N + PE)										
	Rated voltage	208V/220V/230V/240V										
	Power factor	1										
	Voltage precision	±1%										
	Total harmonic distortion (THDv)	≤ 2% at linear load 105% ~ 125% for 1 min, 125% ~ 150% for 30 s, > 150% for 300 ms ≤ 1% at linear load										
	Output waveform	Pure Sinewave										
	Frequency	Synchronized to bypass in mains mode; 50 / 60 Hz ± 0.1% Hz in battery mode										
	Efficiency	ECO mode	96%					98%				
		Online mode	94%					95%				
	Inverter overload capacity (Utility power, 25°C)	100% ± 5% < Load ≤ 105% ± 5% Overload warning only, 105% ~ 125% for 1 min, 125% ~ 150% for 30 s, > 150% for 300 ms										
Transfer time	0 ms											
Crest factor	3:1											
SYSTEM	Maximum parallel units	Up to 4 units parallel optional										
	Communications	USB, RS232 (standard), RS485 / dry contacts / SNMP / CMC Card / EMD Monitoring Device (optional)										
	Communication software	Windows XP/ 2003 and later version; Linux; Unix										
	Display	LCD + LED										
	LCD Display	AC/ DC voltages; kVA/ kW; Frequency; Temperature; Battery & load level										
	LED Status Indicator	Utility power; Battery discharge; Inverter On										
	Alarms	Overload, overtemperature, battery low voltage, overvoltage, undervoltage and fan failure										
General	IP Rating	IP 20										
	Storage temperature	-25°C ~ 55°C (without batteries)										
	Operating temperature	0°C ~ 40°C										
	Humidity tolerance	0-95% (no condensing)										
	Noise Level	<50dB					<55dB			<58dB		
	Standards	EN 62040-1, EN 62040-2, EN 61000-3-2, EN 61000-3-3, IEC 61000-4-2, IEC61000-4-3, IEC61000-4-4, IEC 61000-4-5, IEC 61000-4-6, IEC 61000-4-8, IEC 61000-4-11, IEC 61000-2-2, IEC 62040-2, IEC 62040-1, IEC 62040-3										
	Altitude	≤ 1000 m, derating 1% for each additional 100 m										
Battery	Charging time	< 8 hours										
	DC Voltage	24/36VDC		48/72VDC		72/96VDC		192/240VDC	240VDC	192/240VDC	240VDC	
	Battery Type	Sealed maintenance free lead acid / NiCd / Li battery										
	Battery audible alarm	Normal Sounding every 4 seconds, Low battery sounding every second
