

DALTON

Smart Online Single Phase UPS Double Conversion Technology Rack Mounted

R10 Series

(1,2,3,6,10KVA)

- Dalton R10 Rack mounted UPS is aspire to introduce the latest DSP true online double conversion UPS for protecting critical loads, IT, Data centers, Servers so as to safeguard your valuable equipment and critical data from any interrupted power, such as surges, blackouts and lighting strikes.
- Rack/Tower convertible design.
- Microprocessor control optimizes reliability.
- Filtered, and stabilized sine wave supply.
- (SNMP) card Support.
- Intelligent battery management.
- Generator compatible.
- Two -year warranty For Ups & batteries.
- Eco-mode operation.
- SLC Greenery solution.
- Downloadable monitoring software for Windows, Linux and Mac.

- True double-conversion technology.
- Emergency power off function (EPO).
- Graphical Comprehensive LCD display.
- Converter mode available.
- High efficiency 94%.
- Emergency Power Off.
- Battery test, manual and automatic.
- Wide input voltage and frequency range.
- Backup extensions available for all power ratings.
- Unity power factor 1.
- High input power factor and low current THD.

Dalton R10 The front display panel provides all major systems parameters and operational status of the UPS that include full diagnostics for simple, easy servicing.

R10 LCD series UPS with DSP control, systematically checks each component and displays the result using on LCD display.

This feature allows service technicians the ability to pinpoint and repair the UPS very quickly. is fully digital signaling processor (DSP) controlled to provide quality supply, reduces the number of components and hence increases reliability and improve performance.

Graphical LCD Display

Simple Network Management Protocol (SNMP)

Dalton R10 provide a SNMP which is a popular protocol for network management. It is used for collecting information from, and configuring, network devices, such as servers, printers, hubs, switches, and routers on an Internet Protocol (IP) network.

Dry contact card provides isolated contacts for industrial and remote alarm application.

Inelegant Communications

Software support most OS for remote monitor and control UPS through LAN, warning

notifications through broadcast and mobile phone, multi-shutdown PCs, and schedule UPS self-test.

This unique software provides complete power protection for computer system during power failure

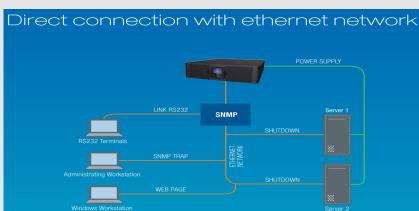

AS 400N CARD RELAY CARD

MODBUS INTERFACE

SNMP CARD

ECO mode operation for energy saving

The ECO Mode function is available on all models allowing for a cost-effective operation of the system as high as 98%. In ECO Mode, the load is supplied by the mains and when the battery is fully charged, the fan will stop running for energy saving. In the event of a mains failure, the inverter takes over the load and provides supply continuity to the connected systems.

Front & Rear Panel

- Front panel only has the LCD display
- Rear panel
- 1. AC Input
- 2. DC Input
- 3. Outlet
- 4. Breaker
- 5. Fan
- 6. Modem/Tel/Fax
- 7. Parallel Card (Optional)
- 8. RS232
- 9. USB
- 10. EPO
- 11. SNMPAS400 (Optional)

Intelligent battery management

Temperature-compensated charging extends life and advanced algorithms recommend replacement date.

The UPS can inform user which batteries

need to be replaced and auto detect when additional battery packs are added.

N+X Power Scalable Parallel Redundancy.

R10 allows system flexibility thanks to the parallel configuration option, up to two UPS units, for 6 kVA and 10 kVA models.

Redundancy proves to be a very economical solution to achieve system growth, both in terms of supported power and autonomy. The parallel configuration equally splits the load between the two units, providing a higher level of continuity to your application.

Technical Specifications

Model			R101000 1K	R101000 1KS	R102000 2K	R102000 2KS	R103000 3K	R103000 3KS	R106000 6K	R106000 6KS	R1010000 10K	R1010000 10KS
